 - Herculis Trustees (Zurich)
- Consists of more than 10 finance and law professionals

The secret to a safe box?

Bourne to Survive

- 'Jason Bourne, an amnesiac intelligence officer, wondered who had a safe box full of cash, six passports and a gun.'
- The answer is clear for Hollywood and for many authorities: the tenant of a safe box in Switzerland, that is... a dangerous criminal!
- The reality is, fortunately, less dramatic for people looking for a safe place to store their valuables with the benefit of optimal security.

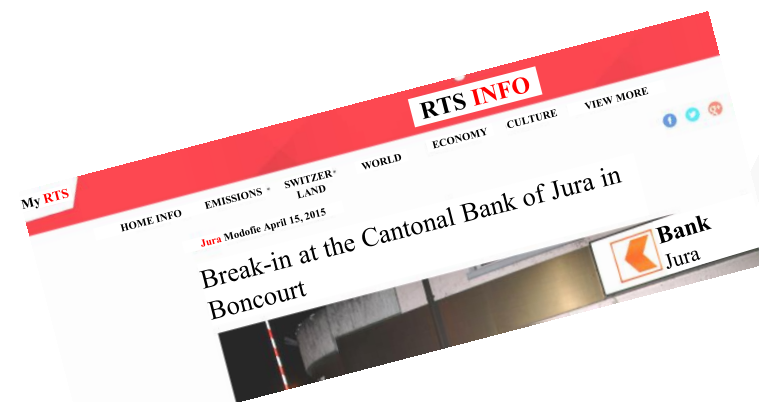

Your valuables are our concern

(sometimes sentimental value is greater than monetary, it is invaluable!)

- **Your monetary savings** (the biscuit tin at the bottom of the cabinet, under the mattress)
- **Gold and precious metals** (the box in the garden under an apple tree)
- **Family jewels** (behind the ice-box in the refrigerator)
- **A collection of stamps, watches, numismatics, books, etc.** (carefully accumulated)
- **Confidential documents, agreements, contracts, various securities and certificates**
- **Digital aspects: computer encryption keys, back-up documents or software**
- **Art work (paintings, antiques, etc.)**

Why a safe box?

These things only happen to others?

HOMESPUN

Two burglars

Two individuals entered into...

Tribune Geneva

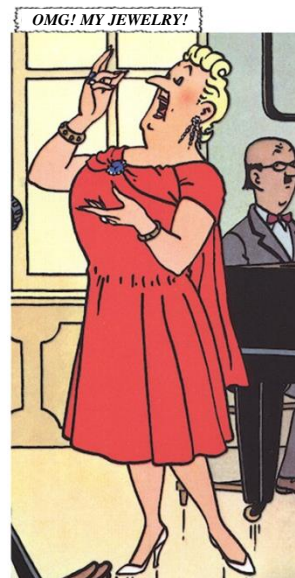

A robber emptied the safe boxes of a jeweller

Geneva The theft on Monday in downtown Geneva has mobilized large numbers of police. An employee was tied up. The robber is still on the loose.

Why a safe box?

These things don't only happen to others!

- Everyone complains about the increase in crime and theft

- No one is immune from a fire, a flood – even with insurance – the loss is irreplaceable!

These things only happen to others!

You take precautions!

- I have home security, I control everything from my mobile
- My safe box is well sealed
- You keep your food in the fridge!

- You keep your clothes in your wardrobe!

- Where do you keep your values and valuable assets?

> In a safe box with the benefit of high security

Why a safe box?

Times are Changing

- Since 2008, the world has changed.
- Now, for the sake of transparency, Swiss authorities are cooperating with other Governments to implement laws and international rules.
- An automatic exchange of information is the norm, and even if banking secrecy is in accord with the law, and even if tax evasion is not a crime for the Swiss, the trend is inevitable.

The procedure for obtaining a safe box is simple

Having a safe box is not illegal – it just needs to be declared – and the private sector framework is a fundamental value still protected in Switzerland

- Proof of identity
- A simple contract of lease

It is possible to give power of attorney to a single individual or jointly maintain it

A high quality product accessible to everyone

- Choice of several sizes tailored to meet everyone's needs
- Individual access to safe boxes
- Safe box's electronic lock can be opened with a fingerprint and personal code (unique for each client)
- A second key is for the customer to open the lock manually.
- With security and discretion, the company can keep the customer key on deposit (security)

A high quality product accessible to everyone

- Possibility of using a booth to view assets
- Flexibility of access (off working hours) to the customer (with advance notice)
- No link to a bank account
- The contents of the safe box are known only by the individual client*

* perishable, hazardous materials, weapons and explosives, drugs, and illegal items are not allowed.

HERCULIS GUARDIANS S.A.
